Core Projects

Library, Documentation, and Information Services department

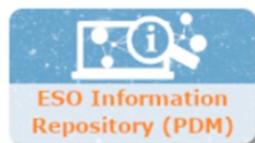

The Library, Documentation, and Information Services Department ([organigram](#)) is a central information unit at ESO. It consists of the Libraries and the Information Repository teams.

Library holdings

The ESO Libraries in Garching and Santiago support your research by:

- providing access to publications and other scientific content
- sharing with you developments in publishing and research communication
- networking with astronomy librarians around the world to fulfill your information requests efficiently
- developing and maintaining tools to provide tailored metrics that help to assess ESO's scientific impact

The ESO Information Repository (PDM) manages and supports the centralization, organization, preservation and distribution of ESO institutional, project and product documentation.

News

25 Oct. 2021: New Scientist subscription ceases 2021

Since the subscription price of the magazine New Scientist will increase by a factor of 10 (!) as of 2022, the ESO subscription will cease at the end of 2021.

Home

The ESO Library team is happy to help you with all information requests you may have.

Information on how to use the library can be found at <https://www.eso.org/sci/libraries/about.html>. The ESO Libraries homepage is located at <https://www.eso.org/sci/libraries/>. Check out the other services offered by the ESO Libraries!

The catalog contains records of all library items, including electronic books and journals. For online resources, direct access is provided from within the catalog. If you would like to consult specific books or articles which are currently not included in our holdings, please [send us a note](#).

Borrowing library material is easy: just use the **Self Checkout** in the top left corner. Login with your ESO credentials and enter barcode number (on the back of the cover page of books, e.g., ML 1994 123456) of the item you want to borrow. We are not applying strict loan periods. Please keep them in your office; do not take library items home or on trips.

In order to locate books in the libraries, please refer to the floor plans below.

Library Garching Upper Floor

<https://libcatalog.eso.org/>

Books & Journals

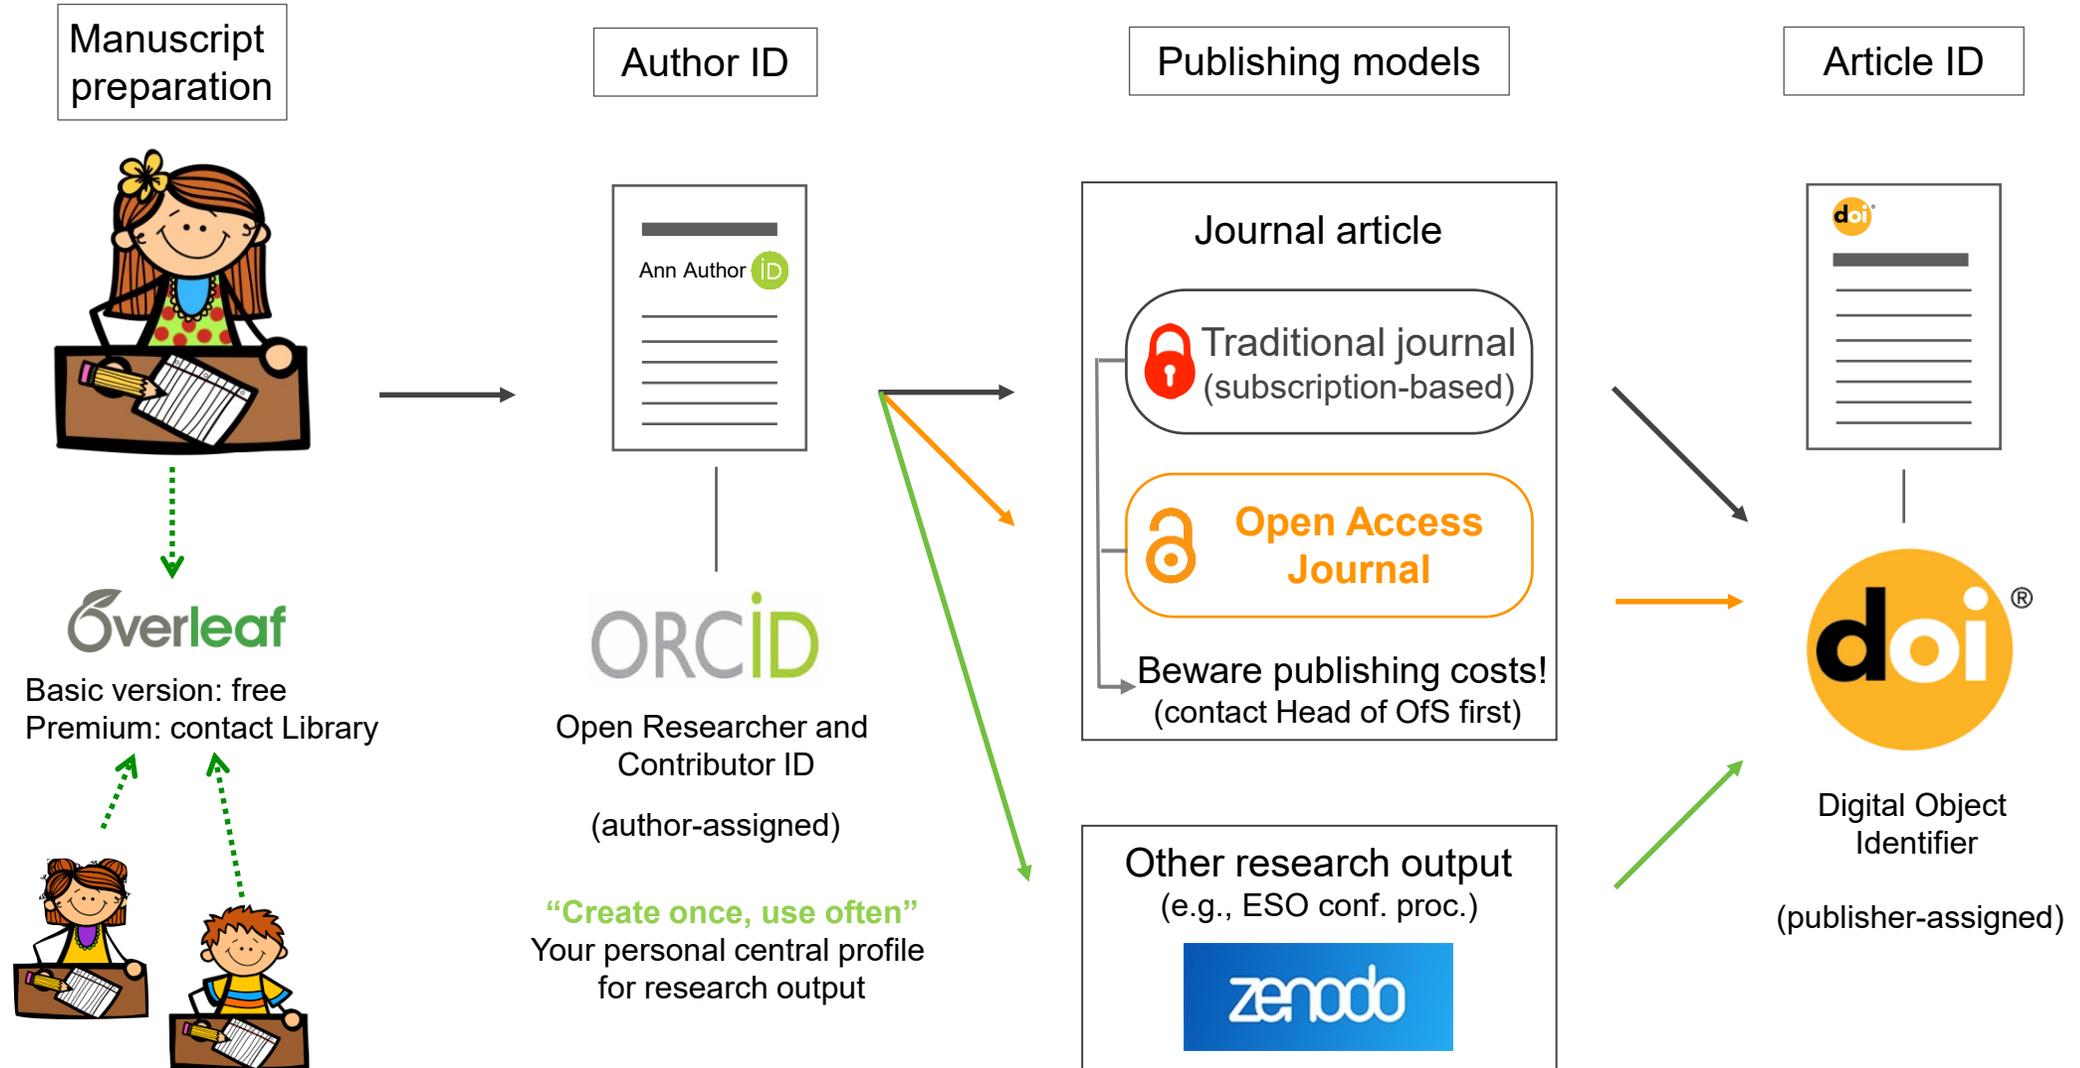

- Books about Astronomy, Optics, Engineering, Physics, ...
- Very relaxed loan periods
- Also purchases on request
- Journals mostly e-only
- Licenses for astronomy and other journals
- Full-text access from anywhere
(ESO IP based; VPN possible)
- Please respect copyright:
use for your research, do not share outside ESO

Telescope Bibliography (telbib)

«How are we doing?»

*«Provide state-of-the-art research facilities
to conduct front-line science.»*

ESO's mission

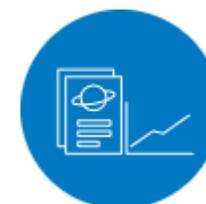

Telescope Bibliography (telbib)

What is telbib?

- database of refereed papers that use ESO data
- built and curated by ESO Library
- <https://telbib.eso.org>

Purpose

- interconnect resources
proposals - data – papers
- measure & evaluate ESO's scientific output
statistics, reports, visualizations

SEARCH

The Telescope Bibliography (telbib) is maintained by the ESO library. It contains refereed publications that directly use ESO data. ESO's [data citation policy](#) specifies how to acknowledge data in papers. Learn more about the [telbib methodology](#).

Explore telbib metrics:

- Click the **VISUALIZE** button on the results page to view **animated charts** of your search results
- Access the [telbib Statistics](#) area to find **interactive graphs** of selected statistics
- Find publication and citation info on the [Basic ESO Statistics webpage](#)
- Use the [overview](#) of annual publication statistics to access all telbib papers that pertain to a given year
- Statistics for a given year will not be complete until approx. March of the following year.

Further info:

Contact the ESO librarians at library@eso.org

If you use information, plots, or visualizations obtained with telbib, please kindly

Features include:

- links to data in ESO Science Archive
- interactive viewgraphs
- export of results to .csv and .txt

Publishing with ESO data

<http://www.eso.org/sci/observing/policies/publications.html>

The screenshot shows the ESO website interface. The top navigation bar includes 'Public', 'Science', 'User Portal', 'Intranet', 'Contact', 'Site Map', 'Search', and 'Go!'. The breadcrumb trail is 'Science Users Information > Observing with ESO Telescopes > Policies and Procedures > Publications with ESO Data'. The page title is 'Publications based on ESO Data'. The main content area states: 'Based on the FAIR principles to make data Findable, Accessible, Interoperable, and Reusable, publications making use of ESO observational data must include the following statement in a footnote or in the acknowledgement:'. A highlighted box contains the required statement: 'Based on observations collected at the European Southern Observatory under ESO programme(s) TP.C-NNNN(R)* or PPP.AAAA.nnn* and/or data obtained from the ESO Science Archive Facility with DOI(s) under https://doi.org/10.18727/archive/NNN***'. Below this, there are instructions on how to substitute the placeholders and where to find the data. A legend defines the codes: T (programme type), P (period), C (category), NNNN (unique integer), and R (run). A large orange text overlay on the right says 'ESO authors are "Ambassadors" for proper data citation'. At the bottom, another orange text overlay says 'Please mention ESO + programIDs and/or Data DOIs in your papers'.
