
The INFORMAL DISCUSSION
on Wed, 12 Dec 2007
at 11:00 am
in the Library

will be led by Uta Grothkopf & Chris Erdmann
(ESO, Garching)

who will discuss:

The ESO Telescope Bibliography

We will be discussing the tools and techniques we use to collect data and build statistics for the telescope bibliography. To start, we will give an overview on the primary tool used to maintain the telescope bibliography, otherwise known as telbib. We will explain telbib's current capabilities along with recent developments to extend it's capabilities to provide more revealing and helpful statistics. During the discussion, we hope to generate more ideas on how to extend the telbib system to address other organization needs and provide further statistics to help guide organizational decisions.
